

MENACER HIBA

Date of birth: 07/02/2006 | Gender: Woman | Nationality: Algerian | Phone: +213 5 52 82 03 94 (Mobile) | Email address: nh_menacer@esi.dz | LinkedIn: in/hiba-menacer | GitHub: github.com/Hiba7Menacer | Address: Medea, Algeria (Home)

Profile

4th-year Computer Science student at ESI specializing in Systèmes Informatiques et Logiciels (SIL). Interested in software development specifically front-end development, UI/UX design, AI, and data analysis. Experienced with Python and SQL for data handling, exploratory analysis, and solving Kaggle/hackathon challenges, with skills in designing user-friendly interfaces and building web projects with HTML, CSS, React, and Figma.

Digital skills

Programming: Python, Java, JavaScript, C	Tools: VS Code, Git/GitHub, Kaggle
Web & UI/UX: HTML, CSS, React, Figma, UI/UX Design	Operating Systems: Windows, Linux
Data & AI: SQL, Data Analysis, Machine Learning, Deep Learning	Personal: Communication & Teamwork, Problem-Solving, Creativity, Adaptability, Time Management

Language skills

- **Arabe** – native / Fluent (Modern Standard and Algerian dialect)
- **French** – B2
- **English** – B2

Experience

Multi media Member

[2023 – 2024]

GDG-SBA, Sidi Bel Abbès, Algeria

- Designed posts and templates for social media.
- Assisted in editing short videos.
- Worked with the team to improve design ideas.

Leader of Multimedia Dep

[2024 – 2025]

GDG-SBA, Sidi Bel Abbès, Algeria

- Planned visual content for events.
- Assigned tasks and followed progress.
- Helped members with design tools.

Member

[2025 – present]

Aiqc — AI Research & Learning Community

- Completed multiple AI/data mini-projects and Kaggle challenges.
- Worked with real datasets and explored data analysis and ML techniques.
- Wrote technical reports on challenges encountered during AI projects.

Intern

[Sep - 2026]

Algérie Télécom, Operational Directorate of Telecommunications, Médéa

- Studied the network and transmission infrastructure (BSS/OSS) across several departments.
- Identified a data-centralization gap across 5 centers, managed manually via Word files and paper.
- Designed the UI/UX and developed the front end for the proposed solution — a shared local data-management system.

Projects

AI Research Project — Time Series Forecasting

July 2026

Python, PyTorch, NumPy, Pandas

- Reproduced the LSTNet architecture and evaluated it against naive forecasting baselines across four benchmark datasets.

- Implemented an FFT-based period detection method to automatically configure LSTNet's skip length, removing the need for manual tuning.
- Conducted controlled experiments using three random seeds and analyzed model performance and limitations.

Academic Mobile Application

June 2025

Kotlin, Jetpack Compose & Figma

- Designed wireframes and user interfaces in Figma based on the application's requirements.
- Collaborated with team members to define user flows and structure the application experience.
- Implemented the front-end interface using Kotlin and Jetpack Compose.

Education

Software Engineering and Systems (SIL)

[2025 – present]

Higher National School of Computer Science (ESI), Algiers, Algeria

Computer Science

[2023 – 2025]

Higher School of Computer Science (ESI), Sidi Bel Abbès, Algeria

Baccalaureate, Scientific Stream

2023

Khadidja Ben Rouissi High School, Medea, Algeria
